

What you don't see could be hurting you. Take action just in time...

Orthus Health Claims Analytics Platform

Orthus Health now offers an easy-to-use online claims analytics platform, driven by a unique claims engine that looks at your medical, pharmacy, and worker's compensation claims. Our data dashboard and population health reporting point to the interventions and programs you need to mitigate claims and prevent moves to higher risk and higher claims categories.

Orthus Health Claims Analytics is offered with Orthus Health Wellness or as a stand-alone service.

Our platform includes:

Online data dashboard

- **Query your population data** – Ask your own questions of the data, using census, medical, and pharmacy data as per service dates, amount paid, ICD codes, provider info, and more. Save your searches to pull up any time
- **Create your own charts and graphs** – View medication compliance, preventive compliance, chronic conditions by amount paid, utilization by age, and other, in visual displays that work best for you

Population Health Management Reports

- **Download current and reliable reporting at any time** – Your complete population health management report is readily available on your data dashboard, capturing and summarizing your claims. Pull any subsets of this report to more closely evaluate costs and plan for targeted interventions

Your custom reports reveal:

- Modifiable risk factors cost burden
 - Chronic disease cost burden
 - Age/gender relationship to disease
 - Gaps-in-care & recommended preventive screenings
 - Drug compliance, non-compliance, and disease severity
 - Distribution of chronic disease vs. non-chronic disease
 - Level of HEDIS compliance (to evidence-based medicine)
 - Co-morbidity-related expenses (e.g. hypertension, depression)
 - Variables that predict and explain high spenders
- **Monitor at-risk populations in real time** – Identify various risk levels within the population, last primary care visit, gaps-in-care, emergency room visits, coaching status, and overall claims costs

Consultative Support

Use your data dashboard and pull reports on your own. Or, work with us to better understand your data and develop an effective ACTION PLAN based on your current claims and historical views. Our consultative support and reporting includes clearly identified Key Findings and innovative Recommendations.

Getting started

It's easy! We will send you a data release letter, new group implementation form, and data request form for your TPA. Once we receive these forms back, we will have you well on your way to uncovering what you need to know about the health of your population, where your cost burdens lie, and most importantly what you can do about it.

Claims Input → Cost-savings Output
